

Do you outsource your Printed Circuit Board Assemblies?

Frustrated with your choice of outsourcing partner?

Want to outsource so you can focus on your core competency?

Many of the Customers we approach are not happy with their own internal purchasing and kitting program or their choice of an outsourcing partner. Many are frustrated with the lack of communication. Most are unhappy that their current partner cannot build an assembly with repetitive quality. All agree that 80% of the dollars, delivery issues and quality challenges on a PCBA are made up in the components.

Deal with someone who is experienced.

At AMS, we have the people, the processes and the tools to assure on time delivery, the quality you expect and timely and accurate communications- so you know what's going on. We are experienced materials managements experts who know how to handle MRP and the handling and storage of electronic components. With over 25 years of experience we will meet or exceed your expectations.

Get timely and accurate communications.

We offer many flexible materials management programs:

- Full turnkey and test from PCBA to complete box build
- Inventory programs
- Vendor managed inventory
- Kitting services
- Contract Purchasing
- End of life and last time builds
- Consignment inventory and buy down of your inventory

Based in San Jose, California, Advanced Material Solutions delivers "Kits" of components and full "Turnkey" to Customers who outsource their Printed Circuit Board Assemblies (PCBA's).
