

Nuvation is an electronic engineering design firm specializing in new product development for embedded systems. Founded in 1997, Nuvation has established a reputation as a full-service, dependable resource for hardware, firmware, and software design services. As such, we look to build long-term client relationships where we can accelerate time-to-market and augment in-house talents across a broad range of projects.

San Jose, CA - HQ

Nuvation has established a reputation as a full-service, dependable resource for a full range of embedded systems design services. We provide accelerated hardware and software design services including:

- *FPGA Design/ASIC*
- *DSP Algorithm Development*
- *Analog/Digital Board Design*
- *Firmware & Embedded SW*
- *Signal Integrity Analysis*
- *Device Drivers*

Waterloo, Canada

Nuvation has completed over 500 successful design projects since our inception. Our industry experience is extensive, as we have come to understand the unique design challenges in each of the following sectors:

- *Telecommunications*
- *Wireless Infrastructure*
- *Semiconductor/Test*
- *Defense/Aerospace*
- *Consumer Electronics*
- *Broadcast Video*
- *Medical Devices*
- *Security / Imaging*
- *Storage/PC Peripherals*
- *Green Power*

Shanghai, China

Nuvation prides itself in delivering projects on time and on budget. We have consistently achieved project success and built client loyalty through:

- *Advanced technical expertise*
- *Efficient, predictable project management methodologies*
- *Dependable engineering execution*
