

Welcome to the SofTEQ Group

The SofTEQ Group is a leading provider of Enterprise Product Lifecycle Management (PLM) solutions and professional services for high technology OEM's. Our business evolved from recent increases in global outsourcing, stricter regulations such as RoHS, ISO, and FDA, and greater product design complexities that have combined to create a costly product development gap. To bridge this gap, we offer professional services along with best-in-class software solutions to improve efficiencies, lower costs, and increase quality.

Enterprise PLM Software Solutions

Is your Parts Database current?

- RoHS/China Data Content
- Part Lifecycle/PCN's
- Cross References
- Part Change Alerts

How is your data managed?

- Single Source for Product Record
- Integrate w/ Eng. & Mfg. Systems
- Compliance for RoHS, FDA, ISO
- Automate changes, flows, Sign-off

How do you collaborate?

- View/Markup/Print EDA,3D,2D docs
- Secure web-based design reviews
- Create E/M Digital Mockups
- Real time collaboration

“Thanks to SofTEQ's continuing support we were able to grow 66% in sales last year, without having to hire additional personnel. This has significantly helped our profitability.”

Ross Bernheim, Production Manager XEI Scientific, Inc.

How can your company benefit?

The Enterprise PLM environment provides access to critical component, bill of material, and product data during the design stage to avoid costly changes in volume production. Direct interfaces to business systems (CAD/EDA/ ERP/CRM) ensure that accurate product information is shared throughout the enterprise to achieve **faster time to market**. Benefits include:

- **Lower costs** associated with Obsolescence, RoHS Management, and Inventory Availability.
- **Collaboration** across geographic boundaries to compress product launch schedules.
- Increased **integration**, control, and communication of product records across the enterprise.
- Automation of **compliance** for ISO, FDA, RoHS, ITAR and other regulations.
